

Precision edge bonding device for G6.110

Item D6

Accessory created for applying quickly and easily glue strips on the edge of any material. Suitable to S8 Intercom systems and G6.110 spraying guns.

The gun, housed in its designated seat, will maintain a fixed distance in height and depth in order to ensure a constant position and width of the bond with respect to the edge. Simple micrometric movements allow a fine adjustment of the gun for an equally precise application of the adhesive by operating the spraying using the special pedal. The operator manually moves the piece following the appropriate reference guides. Constructed of anti-adhesive material, it ensures easy cleaning and maintenance. The object is covered by patent N°123456789
